Progress Measures

Progress is calculated by working out for each child their position in attainment compared with all others who achieved as they did in KS1 and then giving a positive score to those who did better most of their peers and negative score to those who did worse. The scores are not reported for individual children but are averaged and given for each school. Again, we have achieved considerably higher than most other schools. (Progress is not calculated for Punctuation, Spelling and Grammar since the KS1 children did not do this test.)
