

Understanding the world

Years 1 & 2

EYFS

END OF EYFS

Years 3 & 4

MILESTONE 1

MILESTONE 2

Years 5 & 6

MILESTONE 3

Year 7

What do humans and animals need to survive?

What is it like to be human?

What would life be like without electricity?

Why do we have seasons?

Where do animals live?

What do plants need to grow well?

What can we find out about different materials?

How does electricity make appliances work?

How do plants grow and reproduce?

How does light help us to see?

How do we move and grow?

Am I a solid, liquid or gas?

How are rocks formed?

How are sounds made?

How do we classify living things?

How do objects move?

What happens to the food we eat?

How can materials change and can the changes be reversed?

How does the circulatory system enable the body to function?

How does light travel?

How does the circulatory system enable the body to function?

How do the components of an electrical circuit function?

What is evolution?

How will I change as I get older?

How do forces affect things?

How can we classify living things?

Why do we have night and day?
